Epidemiological Curve of Confirmed and Probable COVID-19 Cases¹ in Union County's Community² by Week of Illness Onset Date

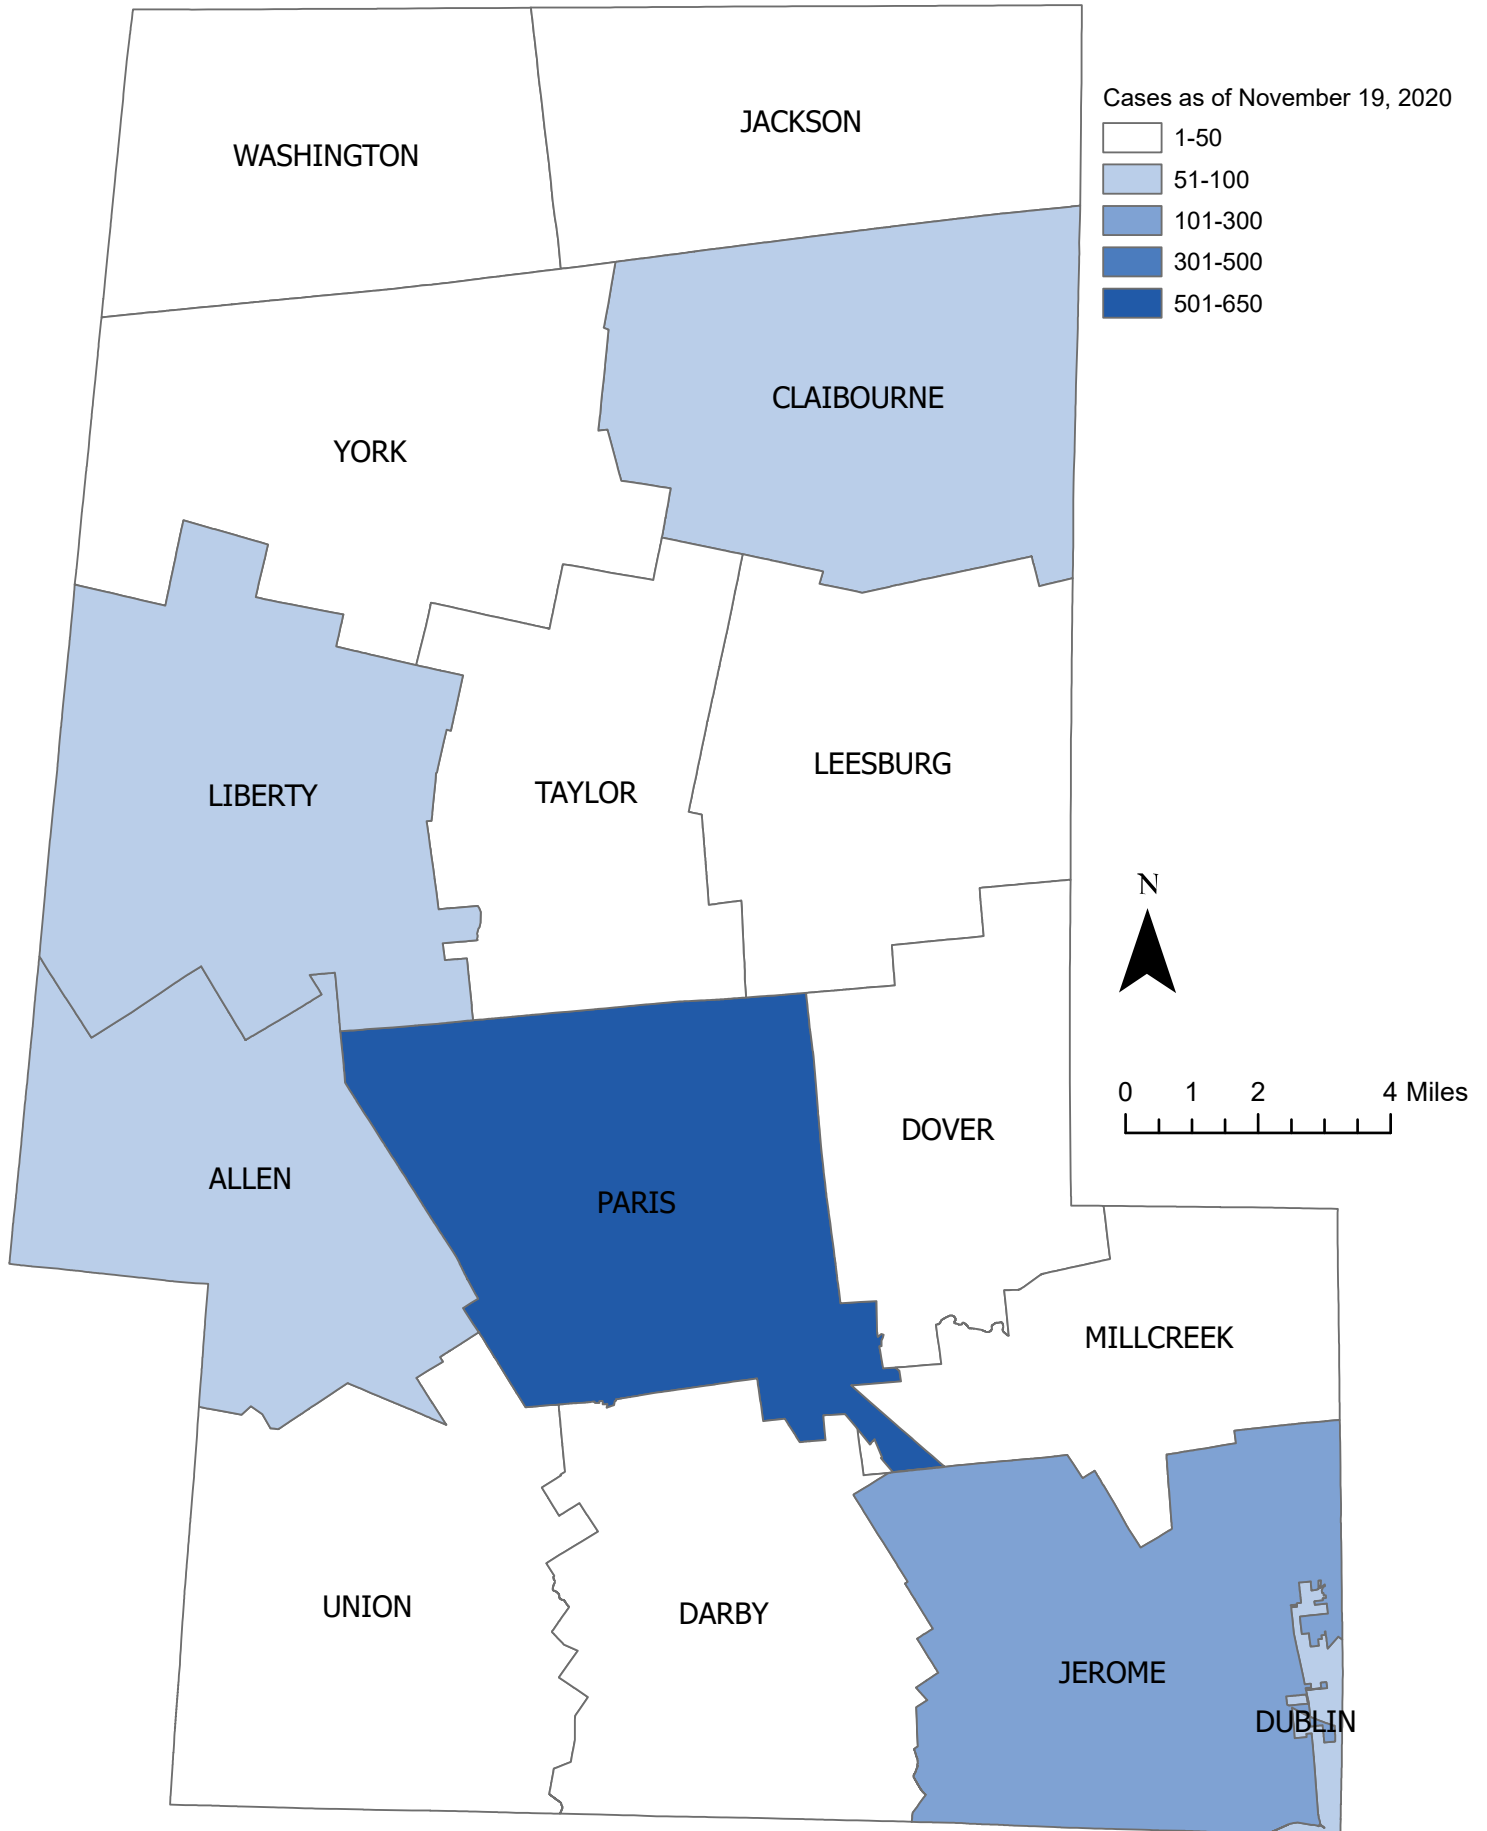

¹Cases for whom an illness onset date is not available are not illustrated. This may be due to the case not yet being interviewed or the case testing positive without experiencing any symptoms.

²This graph does not include illness onset dates on incarcerated cases

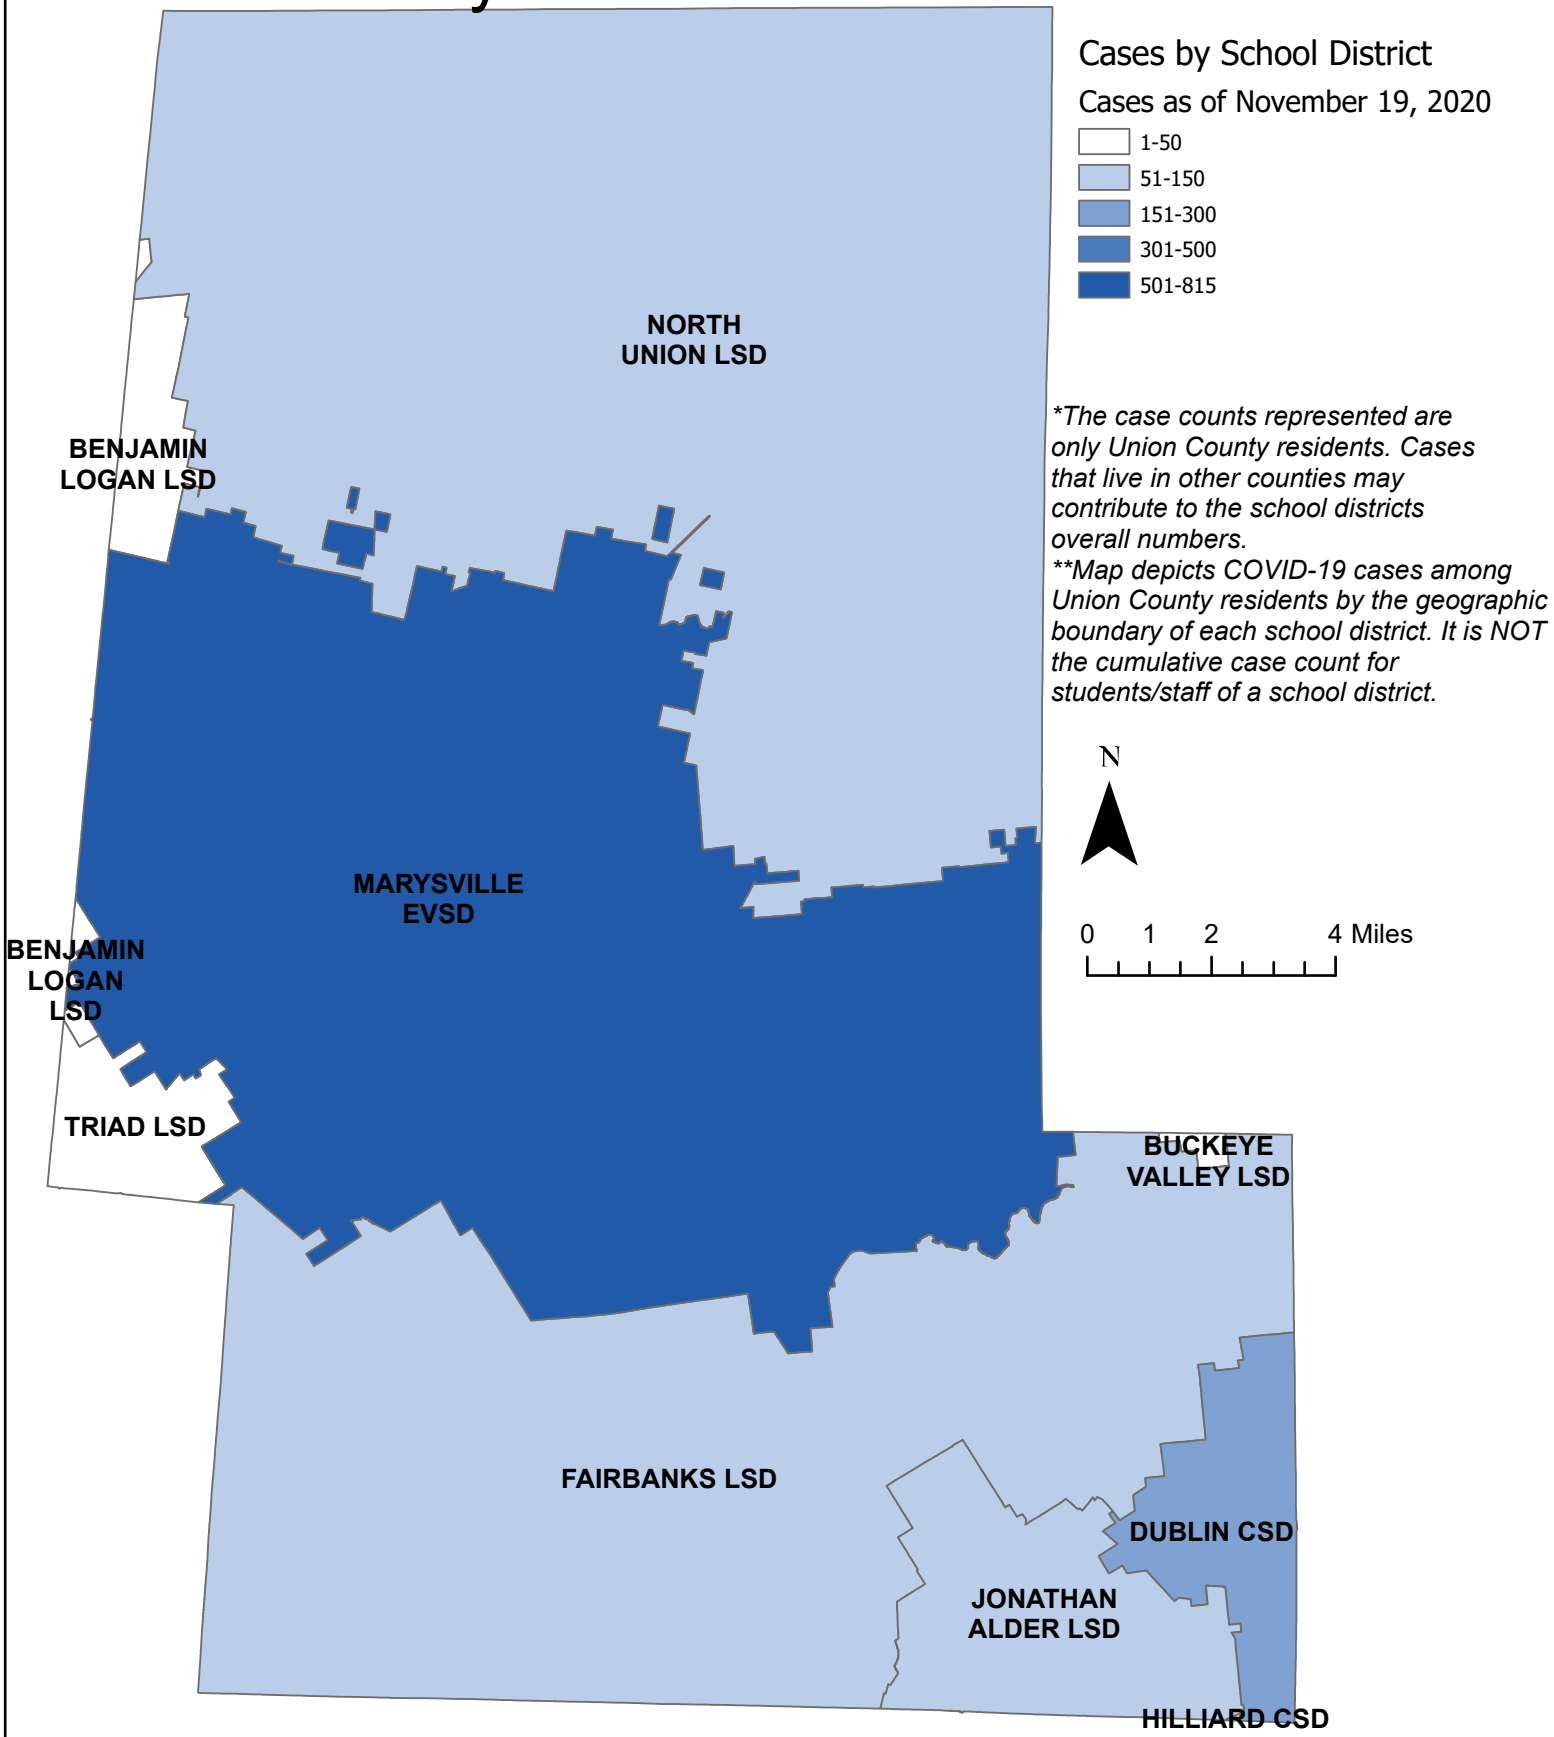

³14-day average is the average number of cases with illness onset occurring in the previous two-week period

This data was collected at 5:00 PM on 11/18/2020

Union County Cumulative COVID-19 Cases by Township of Residence

Union County Cumulative COVID-19 Cases by School District

To be released from isolation a person must meet the following criteria:

1. Be fever free for at least 24 hours without the use of medicine that reduces fevers
-AND-
2. Have improvement of symptoms (for example, cough or shortness of breath have improved)
-AND-
3. At least 10 days have passed symptoms first began

For more information please visit: <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/end-home-isolation.html>

Case Definitions:

Probable: includes the following:

- Individuals experiencing symptoms of COVID-19 who have either traveled to an area experiencing community spread or who are a contact of a laboratory confirmed case
-OR-
- Individuals with a positive antigen result via a test authorized by an FDA under an emergency use authorization and who either were a contact of a laboratory confirmed case or who experienced symptoms of COVID-19

Confirmed: individuals with laboratory confirmation of COVID-19, which is detection of SARS-CoV-2 RNA in a clinical or autopsy specimen using a molecular amplification detection test

For more information please visit: https://cdn.ymaws.com/www.cste.org/resource/resmgr/2020ps/interim-20-id-01_covid-19.pdf

Recovered: individuals who are no longer experiencing symptoms or have had improvement of symptoms and who have been released from isolation
